

Health and Safety Protocols

Grand Amazon Expedition continues to work on a series of **actions towards hygiene, safety, and health** for all our destinations, as well as our commitment to take **care of guests, personnel, suppliers, commercial partners, and in addition, the environment.**

For over 60 years we have been operating with the highest standards, and now we are enriching and strengthening our procedures and protocols, relying on a Medical Advisory Board. This new form of collective caring is present in all activities, spaces and protocols of the hotel, providing a customized experience and consolidating our **leadership in responsible tourism.**

PREREQUISITES BEFORE BOARDING

• **For us, it is very important that your adventure aboard our ship is as special as possible.** In order to protect everyone's health, we are taking additional precautions, including the effective participation of the Secretariat of the Environment of the state of Amazonas.

We would like to inform you that, in order to board our ship, it is mandatory to present a proof of complete vaccination against COVID-19. In case you do not have this proof of vaccination, or in case the vaccination cycle is not complete, a COVID-19 test needs to be taken when entering the ship, and the result needs to be negative. This precaution is necessary for the guests to be able to take the planned rides and to have contact with the local traditional communities. For the mandatory COVID-19 antigen test, a fee of BRL90.00 will

be charged per person. The results will be available within 20-30 minutes after the completion of the procedure. It is important to stress that passengers who test positive for COVID-19 will not be allowed aboard. We recommend you to arrive early for the examination.

In order to streamline the check-in process, we request that the guests bring their original proof of vaccination and one photocopy of said vaccination proof. Besides the requirements of **Grand Amazon Expedition**, we recommend that you check the legal restrictions of the country of destination before beginning the trip. Due to the sanitary restrictions established by the authorities, there may be changes in the excursions and routes.
